**Why are there so
many tekkies in
Leadership UX
positions?**

The Problem With Creativity

Good memory

“Your memory maybe be able hold onto 9 things instead of 4 which makes it easier to learn. But this also makes it more difficult for you to be creative. This is explained by Einstellung.”

Bad memory

“You may have to work harder sometimes, or even much of the time the understand what is going on, but once you get something chunked, you can take that chunk and turn it outside in, and inside out, putting it through creative paces.”

**Creatives in school are
discriminated against...
therefore... we should teach
Arts subjects at the same level
as technical subjects.**

**Creatives in school are
discriminated against...
therefore... we should teach the
technical subjects in a different
way - Dr Barbara Oakley**

Learning How to Learn: Powerful mental tools to help you master tough subjects. University of California, San Diego - Dr. Barbara Oakley

David Allen - Getting Things Done

“Your mind is for having ideas, not holding them”

The basic concept of GTD is that your brain is excellent at having new ideas, but terrible at remembering them

Andrew Doherty @ Amuse 2015

The Hard Way

- **Own the full cycle at least once - UX Process & Software**
- **Benchmark**
- **Plan your promotion**
- **Deep and wide with your education**
- **Deep and wide with your research**
